BOOTH SET UP, SAFETY & TIPS

ANCHORING: For those anchoring their booth (especially pioneering demonstrations), stakes can be used if they do not go into the ground more than ten inches. Deeper anchoring needs to be onto trees, the instructions for wrapping trees from friction burns are to use the materials: 4' to 5' in width carpet strips, 2" x 4" or 2" x 6" wood, Duct Tape, and Rope; using these items place top-side carpet against the tree, and then secure boards onto carpet with rope/duct tape.

FOOD DEMONSTRATIONS: For those doing a food demonstration booth – please remember that recent changes in health department restrictions prevent you from giving out any kind of sample or taste of your demonstration. Only the booth signed up to do the demonstration is allowed to demonstrate the food, which means you cannot allow Scout-O-Rama attendees to prepare the demonstration and then eat or sample it.

DON'T FORGET:

- Pop-Up tent for shade, table(s), chair(s), weights for any loose papers on tables, visible sign advertising your unit & activity,
- Unless previously arranged, no electrical or water hook up will be available. If you are using water or electricity, be sure to bring your own extension cords and hoses (and materials (e.g., tape) to fasten them to the ground to prevent tripping hazards).
- Upon clean-up, remember to “Leave No Trace.”
